

We're recruiting for a **Real World Data (RWD) Analyst** to join our Cegedim Health Data UK team. The focus will be on RWD captured through our unique mix of data drawn from our portfolio of sector leading community pharmacy and GP practice management software, giving our clients access to an unprecedented quality and quantity of healthcare data, enabling vastly improved business, society and patient outcomes.

#### **About the role:**

It's a **part-time, home-based** role working with pharma, biotech and other related life science clients across the UK.

You'll work closely with our Senior Business Intelligence Analyst and Commercial Director fulfilling our client requests; carrying out feasibility studies; identifying new ways of extracting data; carrying out internal research and background work to identify healthcare research trends and assessing the feasibility of designing bespoke dashboards.

- Transform Real World Data into actionable insights in Epidemiology and Health Outcomes research through hands-on manipulation and statistical analysis of complex health datasets
- Consult and collaborate with research partners to inform, conduct, analyse, interpret and report studies using real world healthcare data
- Investigate, critically appraise and apply innovative methods, technologies and tools to better leverage real world data
- Explore novel ways to refine and streamline routine analytics through the development and application of robust approaches

#### **The person we're looking for:**

You're a confident and self-motivated Graduate from a related data or healthcare field with health data experience. You'll have a naturally analytical mind-set who will thrive in a commercial environment, knowing your work can make a difference to clients & patient outcomes as well as helping to shape and grow the business.

- Analytics/dashboard creation, worked with primary care datasets in UK and knowledge of secondary care data and how it compliments primary care linkage.
- Good understanding and knowledge of SQL and R
- Excellent communication, reporting and presentation skills with the ability to communicate and present complex data to non-technical stakeholders
- Excellent written and oral communication skills, with strong attention to detail

#### **Other information:**

You'll be a key part in growing this innovative area of our business providing Real World Data and Evidence (RWD-E) services, including advanced and bespoke analytics to drive cutting edge improvements in patient care, health and outcomes.

You'll join our friendly, professional and focused team that are really passionate about the services they deliver and the impact these have on healthcare all across the UK.

This is a permanent, part-time time position, 20hrs/week

Salary: FTE £40k per annum (pro rata for part-time hours) + bonus + employee benefits package - including matched pension, health cash plan and a well-being allowance.

Location: UK. Remote/home based. There will be a requirement to attend meetings in London office from time to time.

If this is just the role you've been looking for, please [apply directly](#) on our recruitment portal or email any queries to our recruitment team [here](#), thank you.
