Technical Lead / Senior Full Stack Developer (React .Net Core)
We have great new opportunities for experienced **Technical Leads/Senior Software Developers** to join our talented R&D team in a lead role working on our award winning healthcare product portfolio, driving innovations and efficiencies across the UK's pharmacy sector.

What will you be doing
This role will see you working on an exciting green-field product portfolio and a range of new features. We're evolving our existing products to provide our customers with ground breaking, time saving solutions; undertaking a complex and challenging journey actively rebuilding a heritage technology stack from the inside out, whilst all our customers continue to use this business critical solution. This will allow us to deliver incremental value, ensuring our customers can seamlessly use the existing solutions whilst benefiting from the new value adding features.

You will work in one of the feature teams on the specification, detailed design, coding and testing on new product areas, as well as with enhancements. You'll also be actively involved in solutions design, design workshops and code review, liaising with the Architecture team, as well as participating in Agile Scrum stand ups, reviews and retrospectives.

The person we're looking for
You're an experienced Software Development professional with strong React and .Net Core coding experience. Someone with a genuine interest in and enthusiasm for delivering quality solutions and code. You'll be happy to seek out, learn and apply new technologies to aid with and improve development. Team work and collaboration is vital to the success of the project, so you'll have excellent communication and interpersonal skills. You'll be comfortable mentoring and coaching others in the team, inspiring and leading from the front, encouraging and contributing new ideas to drive innovations. You'll have prior commercial experience with:

- React, React Hooks
- HTML5, CSS and Typescript/JavaScript skills
- C#/.Net Core Microservices
- Design Patterns, GoF, MVC, MVVM
- Web Services, REST, XML, JSON
- Databases – PostgreSQL, ElasticSearch, MongoDB

If you have any experience with Apache Kafka, real time streaming architectures, Docker/Kubernetes, web security, Atlassian or UX principles (e.g. responsive design) it would also be very beneficial in the role.

What we offer
This is an excellent opportunity to make your mark on our flagship Pharmacy Solutions product portfolio, using the latest technologies and tools, helping shape and deliver the best solutions.

You'll be joining our friendly, talented and collaborative team; we have a culture where everyone pulls together, we are really passionate about the solutions they deliver and the positive impact the work we do has on healthcare services all across the UK. Our Product and Development team are focused on building great technology that delights our customers.

There's a competitive salary along with a great range of employee benefits - including matched pension, health cash plan and a well-being allowance - plus personal development and opportunities for your career progression longer term.

This is a permanent, full time role (35hrs/week, Mon-Fri)
UK based, flexible on location; working from home and/or office (Leyland)
Salary up to £65k DOE + benefits

Please apply directly on our recruitment portal or email any queries to our recruitment team here,
thank you.
