

Senior UX Designer

Are you an experienced and talented User Experience professional, driven by exceptional UX design? Do you have the ability and vision to deliver market-leading experiences? If so we could have the role for you, joining our team as a **Senior UX Designer**

What will you be doing

Working as a lead member of our growing, dedicated User Experience team, you'll be at the heart of our product, driving it forward, gaining insight into users' intentions and behaviours, and utilising this knowledge to create interface designs that are immersive, intuitive and aesthetically pleasing. You'll help manage and mentor other members of the UX team, work collaboratively across Product and Development feature teams, maintaining strong relationships with our key stakeholders.

The person we're looking for

As an experienced Senior UX Designer, with prior experience of mentoring and managing others, you are comfortable with the full design and development cycle from research, analysing complex user and business requirements, sketching, wire-framing and prototyping through to test and launch. You're passionate about design, persuasive in articulating designs, engaging and communicating effectively with internal and external stakeholders to deliver the best possible product effectiveness and user experience.

- Experience in designing for cross-platform solutions (Desktop, Web & Mobile)
- Proficient in Figma, Sketch, or other wire-framing tools
- Experience in carrying out user interviews, testing and analytical research
- Ability to work under own initiative, as well as being a strong collaborator
- Ability to inspire, mentor and manage more junior members of the team
- Ability to prioritise projects, solve complex problems, communicate progress, and deliver on time

What we offer

This role gives you the opportunity to have real impact on the product design and development of the team. You'll be encouraged to use your prior UX experience, along with your natural creative flair and great communication skills, to influence and innovate on requirements and design concepts across multi-platform software applications.

You'll be joining our friendly, talented and collaborative team; we have a culture where everyone pulls together, we are really passionate about the solutions they deliver and the positive impact the work we do has on healthcare services all across the UK. Our Product and Development team are focused on building great technology that delights our customers.

There's a competitive salary along with a great range of employee benefits - including matched pension, health cash plan and a well-being allowance - plus personal development and opportunities for your career progression longer term.

This is a permanent, full time role (35hrs/week, Mon-Fri)

UK based, flexible on location; working from home OR hybrid home and office (Dundee)

Salary up to £40-50k DOE + benefits
